DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 35-50 and 55, drawn to an electrical machine including rotor stator and coil structures and their interrelationship..

Group II, claim(s) 51-54, drawn to magnetic shielding of an electrical machine.

Group III, claim(s) 56-66, drawn to a cooling system of an electrical machine.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

WO-A-95/03646 to Lillington et al. (See Figure 1 and page 2, lines 1-32) and EP-A-0422539 to Anwander (See Figures 3 and 4) disclose all the features of claim 35.

Because the technical features of claim 35 are known the remaining claims lack a common technical feature.

The three groups differ from each other in the following special features:

Group I : an interchangeable support element on the rotor , , magnets and their support elements detachably affixed to the rotor in an axial direction, multi-layers coils switcheable in series and/or in parallel configuration and bonded with adhesive.

Group II: wire or sheet metal shielding disposed concentrically to the machine axis.

Group III: an air-cooled housing including air inlets, heat or geothermal heat exchanger for gas or fluid medium, particle filter with a permanent magnet or fine sieve.

Consequently, there are no identical or corresponding technical features that could substantiate a common inventive idea, and the connection between the inventions as required by PCT Rule 13.1 and 13.2 is lacking.

3. A telephone call was made to Allison C. Collard on September 25, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Waks whose telephone number is (703) 308-1676. The examiner can normally be reached on Monday through Thursday 8 am to 5 pm.
